

During your visit, your school group will receive a detailed tour of the museum's two fossil-filled exhibition halls as we discuss various highlights from the history of life. Your group will also view a short film which takes them along on a recent dinosaur discovery made by the museum. This presentation enables your group to see the dynamic, scientifically-active side of the Alf Museum.

For more information about our group tours and/or to schedule a tour, please contact Kathy Sanders at 909-482-5225, or by email at ksanders@webb.org .
